

Up-Cycle & Recycle Guide

Scents & Serenity uses product and shipping packaging which is made from natural materials without any additional coatings/finishes to ensure its suitability for recycling. Where possible please recycle or reuse packaging and together we can make a difference.

All our products have their own unique eco-friendly credentials and features. This unique feature, not offered widely in the home fragrance market, ensures you get great value for money and overall reduces unnecessary waste.

20cl & 30cl Candles

The frosted glass tumblers are easy to clean as soy wax has a lower melting point than other wax on the market. To reuse this container once your candle is fully burned, carefully place the glass in warm (not hot) soapy water and simply wipe away any excess wax gently with a soft cloth. Do not place in dishwasher, microwave or oven. To reduce the risk of damage to the glass do not use abrasive materials.

Reuse with Scents & Serenity's high-quality XL tealights. The XL tealight fits both 20cl and 30cl tumblers and can be placed in the bottom of the tumbler. Alternatively, you could add crystals or decorative stones to the tumbler before adding your XL tealight raising the candle to give it a 'full' effect. Always ensure you have created a stable, flat surface for your tealight which is heat proof. The frosted tumbler can have many other creative uses - take a look at our social media pages and website for more inspiration.

Reed Diffusers & Spray Bottles

All of our 100ml Frosted Glass Diffusers and spray bottles can be refilled with our liquid refill bottles. You can even choose a different fragrance in the range.

To prepare the glassware for new liquid gently wash in warm soapy water using a soft cloth with no abrasion. Once clean and fully dry, fill with your chosen fragrance. Each Refill comes with a handy mini funnel to ensure you are able to pour your liquid in safely. You will also receive 7 brand new black fibre reeds with all reed diffuser refills.

To place an order please contact Scents & Serenity with your requirements: scents_serenity@outlook.com
