

# Reed Diffuser Care Guide

Scents & Serenity pride themselves in offering a luxurious range of home fragrance products made from the finest quality ingredients. All of our reed diffusers are expertly blended and poured in Yorkshire. Each diffusers includes 7 black fibre reeds to give all our diffusers the best scent throw possible. All our products have their own unique eco-friendly credentials, please refer to our re-use & recycle guide for more information.

To get the most out of your reed diffuser please follow these simple steps:

- Unscrew the silver cap. Using gloves remove the plastic bung carefully (these are very secure to ensure no leakage occurs when shipped). Replace the silver cap and place the black fibre reeds in the diffuser.
- For a strong scent or a large room use all of the reeds. For smaller spaces or a more subtle scent throw use fewer reeds. Do not flip the reeds.
- Place the diffuser on a flat surface away from pets and children to avoid accidental spillage or injury. Keep the diffuser away from delicate surfaces and fabrics. If accidental spillage occurs clean immediately.
- If the liquid comes into contact with the skin or eyes please wash immediately with running water. Seek medical advice if an allergic reaction occurs. Do not use if sensitive to strong perfumes or fragrances.
- Try to keep the diffuser at room temperature. Cooler rooms reduce the volume of the liquid diffusing up the reeds. Warmer rooms increase the rate the fragrance is diffused. On average your 100ml Reed Diffuser should last approx. 8 weeks.

**SCENTS & SERENITY ASSUMES NO RESPONSIBILITY FOR ANY DAMAGE OR INJURY THAT MAY OCCUR DUE TO MISUSE OF REED DIFFUSERS.**
